

HAITI UPDATE

March 14, 2017

Folks, here is one of the church buildings that we are restoring. We are rebuilding 4 buildings that were totally destroyed and we are restoring 8 buildings which lost their roofs. Some congregations took it upon themselves to restore their own buildings, some received funds from us to buy the materials. The TIMOTHY TEAMS report there are at least 6 more buildings in remote areas that were damaged but they had not reported to us.

It is important to remember that all of our church buildings double as schools. The kids are sitting under trees while their buildings are being rebuilt or restored. This is the reason why we work so hard to get the buildings restored. This time we have a very reputable constructing firm that is not cutting corners.

Also, the rainy season is starting any day now. We have been lucky with the weather so far. We will not be able to finish everything before the first big rains come but we will try to get all kids indoors under the roof. Soon I will have more pictures of finished buildings.

I want to thank you again for giving so generously to make all this possible. For our brothers and sisters (and many denominational visitors) this is a testimony to the love you all have for God's work on earth. You care about other Christians wherever they may be.

God bless, Joe W.
